Created: Wed Jan 18 12:07:13 2006

The following document shows all changes in the database schema after applying the Oracle Critical Patch Updates January 2006 on top of a default database. All these databases were patched with Oracle CPU October 2005 to see the delta between both patches.

If you are using a different configuration it is possible that other packages are also affected.

RepScan was used to generate and compare the database baselines.
